

Item Name : Connection Wires

Item Code : 3044.2008.01

Item Description :

Connecting Cables – 30cm long – Each. These connecting leads have a 4mm plug on both sides. The cables are insulated. The connecting cable measures 30cm long. Supplied as one cable. These cables are suitable for low-voltage circuits. Cables are a must have for your science electricity circuit sets. Every circuit needs connecting cables! Students are around electrical appliances all day that rely on electric circuits for their operation. By creating their own circuits, students learn the principle behind the appliances turning on and off and working. It is great for critical thinking, problem solving and deductive reasoning. When a circuit does not work the way it should, students will have to work out where the mistake has been made, fix the problem and try again until it works.
