

Item Name : Gold Leaf Electroscope

Item Code : 3064.2008.01

Item Description :

In this instrument, a metal disc is joined to a narrow metal plate and a thin sheet of gold leaf is secured to the plate. We cater well fitted Gold leaf electroscope in standard size for physics lab use. These rectangular shaped electroscopes are mainly designed to detect & measure the static electricity or voltage. A glass front stops air currents but allows you to analyse the behaviour of the leaf.
